Analysis

1. Total Sales for Each City
2. Top 5 Cities by Total Sales
3. Month-wise Total Sales
4. Best-Selling Product Category
5. Most Frequently Used Payment Method
6. Top 5 Best-Selling Products
7. Average Customer Age for Each City
8. Sales Contribution by Each Year (2023 vs 2024)
9. Customer Ratings Distribution
10. Age Group-Wise Sales Analysis

Prompt :

Hello, ChatGPT!

I have sales data in an Excel file, From columns A to O in Sheet SalesData, with the following fields: transaction_id, date, day_name, month_name, year, product_category, product_name, units_sold, price_per_unit, total_sales, customer_name, customer_age, city, payment_method, and customer_ratings.

The total number of rows in the file is 101, including the header row.

I want to perform some tasks using formulas to extract insights from this data, which I need to present to my boss. Can you help me?

Total Sales for Each City

I want to calculate the total sales for each city using a formula. The result should be displayed in another sheet with two columns: 'City' and 'Total Sales'. Can you provide the formula?

Top 5 Cities by Total Sales

I want to find the top 5 cities with the highest total sales. The result should be displayed in another sheet with two columns: 'City' and 'Total Sales'. Please provide the formula to get this ranking.

Month-wise Total Sales

I want to calculate the total sales for each month. The result should be displayed in another sheet with two columns: 'Month' and 'Total Sales'. Can you give me the formula?

Best-Selling Product Category

I want to find out which product category has the highest total sales. The result should be displayed in another sheet with two columns: 'Product Category' and 'Total Sales'. Can you provide the formula?

Most Frequently Used Payment Method

I want to determine which payment method was used the most in the sales data. The result should be displayed in another sheet with two columns: 'Payment Method' and 'Transaction Count'. Please provide the formula.

Top 5 Best-Selling Products

I want to find the top 5 products with the highest total sales. The result should be displayed in another sheet with two columns: 'Product Name' and 'Total Sales'. Can you give me the formula?

Average Customer Age for Each City

I want to calculate the average age of customers for each city. The result should be displayed in another sheet with two columns: 'City' and 'Average Age'. Please provide the formula.

Sales Contribution by Each Year (2023 vs 2024)

I want to calculate the total sales for each year and determine their percentage contribution to the overall sales. The result should be displayed in another sheet with three columns: 'Year', 'Total Sales', and 'Sales Contribution %'. Can you provide the formula?

Customer Ratings Distribution

I want to count how many transactions fall under each customer rating (from 1 to 5 stars). The result should be displayed in another sheet with two columns: 'Customer Rating' and 'Transaction Count'. Please provide the formula.

Age Group-Wise Sales Analysis

I want to analyze sales based on different customer age groups:

- 18-25 years
- 26-35 years
- 36-45 years
- 46-55 years
- 56+ years
- The result should be displayed in another sheet with two columns: 'Age Group' and 'Total Sales'. Can you give me the formula to calculate this?
